MALIK IAVARI

14 York Street, Toronto, ON M5J0B1
519-729-7843 | malikiavari@gmail.com | https://www.linkedin.com/in/malikas05/

OBJECTIVE

A hard-working, smart and self-motivated graduate in Computer Science with 2 years work experience, I have completed various complex projects in Java(Android and Spring framework), as well as consulted and tutored undergraduates. I am seeking challenging mobile application developer position with possibility to apply my knowledge of Java and Swift to further my skills while contributing to the organizational goals.

HIGHLIGHTS OF QUALIFICATIONS

- ✓ Over 2 years of experience designing and implementing impactful mobile applications using Java, Kotlin, Android Studio, Swift and Xcode, Gradle, Maven, JSON, RESTful web services(JAX-RS, Spring Boot, Spring Data JPA), ButterKnife, Dagger 2, Retrofit, Realm, Android Support Library, SQLite, ORM Frameworks(GreenDAO, Sugar ORM)

- ✓ Around 2 years of experience designing and developing web applications using HTML5, CSS3, Bootstrap, Java(Spring Framework, JSP, JSF, Servlets, Tomcat), MySQL, JavaScript(Vue.js), jQuery, XML and AJAX

- ✓ Around 1 year of experience deploying web and mobile applications on Cloud based platforms such as Firebase and Amazon Web Services

- ✓ Good knowledge of various data structures and algorithms(List, Map, Stack, Queue, Tree)

- ✓ Competitive at: strong problem-solving, analytical and project management skills, with demonstrated leadership abilities, exceptional communication and interpersonal skills

- ✓ Fluent in: Russian, English and basic knowledge of German

EDUCATION

George Brown College	Toronto, Canada
Ontario College Advanced Diploma: Computer Science	2015-2018
3.75 GPA	
Academy of Management "TISBI"	Kazan, Russia
Bachelor's degree: Computer Science	2015-Current
Gymnasium #122	Kazan, Russia
High School Diploma	2015

Honors: graduated with two gold medals for achievements in Math and Information Technology

4.0(A+) GPA

IT EXPERIENCE

George Brown College   Toronto, Canada

Mobile Application Developer   10/2017 to Current

- ➢ Creating Android and iOS application from scratch using native technologies
- ➢ Developing application that supports youth dealing with crisis
- ➢ Deploying application on BaaS(Firebase platform)
- ➢ Implementing database integration using ORM technology(GreenDAO for Android)

Alpari   Kazan, Russia

Android Developer   07/2017 to Current

- ➢ Developed Android application for the employees of Alpari company
- ➢ Increased working capacity of the staff by tracking geolocation of employee's mobile phone
- ➢ Reduced company's expenses by 30% on the salaries to employees
- ➢ Realized new functionality by providing employees to choose extra day to work

George Brown College   Toronto, Canada

Peer-tutor   01/2016 to 04/2017

- ➢ Helped and assisted students with challenges they faced with various programming languages
- ➢ Encouraged students to debug and optimize software components

Maryana Region   Kazan, Russia

Analyst / Web Developer   09/2012 to 05/2014

- ➢ Developed computer software web application using PHP, JavaScript and MySQL
- ➢ Analyzed and designed relational databases using Microsoft SQL Server

PROJECTS AND OTHER CERTIFICATIONS

- ✓ Created time tracking web application (TimeTrack) in PHP, JavaScript and Bootstrap - Github link: https://github.com/malikas05/gbcPhpProject
- ✓ Created the simple clone of well-known "Instagram" app for Android - Github link: https://github.com/malikas05/instagramAppAndroid
- ✓ Created Android application for clinic to allow them to store info about their patients - Github link: https://github.com/malikas05/Nextgen-clinic-app-android
- ✓ Javarush - Completed all 40 levels of the project learning Java Core (javarush.ru)
- ✓ Passed the test that proves the knowledge of Java Core and awarded with 2 certificates from CCA (Cambridge Certification Authority)
- ✓ Was invited by George Brown College and chose among 20 students to work on a big project(Android and iOS application that supports youth dealing with crisis). Currently working on that mobile app, see the link to get familiar with my code - Github link: https://github.com/malikas05/Mellow-App
